

JULY 25th, 2019

MEMORANDUM

TO: INTERESTED PARTIES

FR: MAGELLAN STRATEGIES

RE: COLORADO 2020 GENERAL ELECTION VOTER OPINION SURVEY

This is a summary of a telephone and online survey of 500 likely 2020 general election voters in the state of Colorado. The interviews were conducted from July 15th to 17th, 2019. The overall results have a margin of error of +/- 4.38% at the 95 percent confidence interval. The survey data was weighted to reflect the voter turnout demographics of past presidential election cycles in Colorado.

Survey Objective

The focus of this survey was to measure and understand the political environment in Colorado following the 2019 legislative session and looking ahead to the 2020 general election.

Understanding Presidential Election Turnout Demographics in Colorado

Before reviewing the survey results, it is important to understand the major subgroups among likely 2020 general election voters in Colorado. Considering the significant growth of unaffiliated voters in the state, and the fact that they comprised 34% of turnout in the 2018 midterm, we are projecting that unaffiliated/other party voters will make up 37% of turnout in 2020. Democratic voters have been remarkably steady at 33% of turnout whether in midterm or presidential elections, and that is where we have them projected for next year. That leaves Republicans trailing at 30% of turnout.

This is not meant to be a suggestion that Republican turnout will be lagging, or depressed in any way. It is simply because we expect unaffiliated turnout to rise and that will come at the expense of Republicans. Comparing the 2014 midterm turnout to the 2018 midterm turnout, Republican percentage of overall turnout dropped from 37% to 32%, while the Democratic share of turnout actually increased from 32% to 33%. It is therefore reasonable to expect a similar drop for Republicans from 2016 to 2020.

Also, because voters age 18-34 showed a significant turnout increase in 2018 compared to 2014, we are projecting them at 27% of turnout, compared to 25% in 2016. The other four age ranges are weighted as follows: 35-44 at 16%, 45-54 at 17%, 55-64 at 19%, and voters age 65 and older at 21%.

Key Findings:

- Voters are evenly split when asked if Governor Polis and the Democratic state legislature overreached during this past legislative session, passing bills that went too far and were out of touch with everyday Coloradans. A plurality of voters, 45%, believe that they did overreach, 40% do not think they overreached, and 15% are unsure or don't have an opinion.
- Despite 45% agreeing that Governor Polis and the legislature overreached this past session, 47% of voters oppose the effort to recall the Governor, 38% support recalling him and 15% are undecided.
- Right now, nearly 30% of voters who do agree that the Governor and the legislature overreached remain unconvinced that a recall is the right course of action.
- Colorado voters are evenly split regarding the direction in which the state is headed. Among all respondents, 44% think things in Colorado are headed in the right direction, 41% feel things are off on the wrong track and 15% are unsure or do not have an opinion.
- Democratic voters have a slight edge in voter intensity heading into the 2020 elections, though Republicans and unaffiliated voters show a high level of interest as well.
- Currently, Colorado voters prefer Democrats to have control of Congress by a 10-point margin, 47% to 37%, over Republicans.
- A majority of voters, 57%, disapprove of the job Donald Trump is doing as President, compared to only 39% who approve of the job he is doing.
- President Trump trails a generic Democratic Party candidate by 12 points, 44% to 32% in a 2020 ballot test, with 15% of voters choosing some other candidate and 8% being undecided.
- Governor Jared Polis currently has a +12% job approval rating as 49% approve of the job he is doing, 37% disapprove and 14% are unsure.

Colorado Voter Mood

Colorado voters are evenly split regarding the direction in which the state is headed. Among all respondents, 44% think things in Colorado are headed in the right direction, 41% feel things are off on the wrong track and 15% were unsure or did not have an opinion. As expected, there are significant differences of opinion among Democrats and

Republicans regarding the well being of the state. Among Democratic voters, 58% think things in Colorado are headed in the right direction compared to only 25% of Republican voters sharing this viewpoint. Interestingly, roughly one quarter of Republicans think the state is headed in the right direction, while roughly one quarter of Democrats feel things are off on the wrong track. Among the all-important voter subgroup of unaffiliated voters, 47% think things are headed in the right direction and 36% think things are off on the wrong track.

Younger voters are more optimistic about the direction of Colorado than older voters. Among voters 44 or younger, 50% think things in Colorado are headed in the right direction and only 32% think things are on the wrong track. Among voters 65 and older, 38% think things are headed in the right direction and 43% think things are off on the wrong track. There is also a notable split across geographic lines, as 49% of voters in big cities and 45% of voters in suburbs think things are headed in the right direction, compared to only 32% of rural voters.

*“Generally speaking, do you think things in Colorado are headed in the right direction or do you feel that things are off on the wrong track?”**

*Voter subgroup margins of error, men 6.3%, women 6.1%, Republicans 8.0%, Democrats 7.6%, unaffiliated 7.3%, 18-44 6.7%, 45-64 7.3%, 65+ 9.7%, suburban area 6.3%, city area 9.0%, small town area 11.2%.

Early Measurement of 2020 Voter Intensity

At this early stage, with President Trump increasing his attacks on Democratic lawmakers and the Democratic Presidential Primary debates now officially underway, the survey measured voter intensity to gauge just how much partisan and unaffiliated voters are currently engaged and excited to vote. Using a scale of 1 to 10, respondents were asked to rate their interest in the 2020 elections for President, Congress and the state legislature, with 10 meaning they are very interested, and 1 meaning they are not interested at all.

Among all respondents, 62% of voters responded with a 10. The results by party registration find 67% of Democratic voters answering with a 10, compared to 66% of Republicans and 54% of unaffiliated voters. When adding together the percentage of voters that responded with a 10 or 9, the survey finds Democratic voters slightly more interested in the 2020 election than Republicans by an 4-point margin, 77% to 73% respectively, with unaffiliated trailing at 68%. While it is expected that interest would be lower among unaffiliated voters – they are unaffiliated for a reason – it is striking that they are not too far behind. Combined with high unaffiliated turnout in the 2018 midterm election, this is just another data point to suggest that turnout among unaffiliated voters will be at a record high in 2020.

Older voters are also more engaged at this point, with 74% of respondents over age 65 answering “10”, and 67% of voters age 45-64 answering “10”. Voters age 18-44 trail behind with only 51% answering “10”, though that is still a significant marker this early. We would expect interest among younger voters to grow as the cycle progresses.

*“Although it is a very long way off, how interested would you say you are in the 2020 elections for President, Congress and the state legislature? Using a scale from 1 to 10, with 10 meaning you are very interested in the 2020 elections, and 1 meaning that you are not interested at all, please choose a number that best describes your interest in the 2020 elections.”**

Congressional Partisan Control

The survey included a question on voter preference for partisan control of Congress following the 2020 elections. Currently, voter opinion on who should have control of Congress has Democrats holding a 10-point lead, 47% to 37%, over Republicans. Among male voters the lead is smaller, 44% to 42%, though among female voters there is a significant gap, with 50% of female voters preferring a Democratic Congress compared to only 32% preferring Republican control. Among the all-important unaffiliated voters, Democratic control leads by 18 points, 42% to 24%. Suburban voters, who make up 48% of the survey sample, also prefer a Democratic Congress by an even wider margin of 59% to 28%.

*“What is your preference for the outcome of the 2020 November elections for the United States Congress? Do you want Congress to be controlled by Democrats or Republicans?”**

<u>Response</u>	<u>All</u>	<u>Men</u>	<u>Wom</u>	<u>18-44</u>	<u>45-64</u>	<u>65+</u>	<u>Rep</u>	<u>Dem</u>	<u>Unaf</u>	<u>Big City</u>	<u>Sub-urbs</u>	<u>Smal Twn.</u>

*Voter subgroup margins of error, men 6.3%, women 6.1%, Republicans 8.0%, Democrats 7.6%, unaffiliated 7.3%, 18-44 6.7%, 45-64 7.3%, 65+ 9.7%, suburban area 6.3%, city area 9.0%, small town area 11.2%.

Donald Trump Job Approval

A majority, 57% of respondents, disapprove of the job Donald Trump is doing as President, compared to only 39% who approve. That includes a significant 49% who strongly disapprove of the job President Trump is doing. Voters aged 18-44 (69% disapprove), suburban voters (64%), women (60%) and voters in big cities (60%) are the most likely to disapprove of the president’s performance. Among the major demographic subgroups, only Republicans and voters aged 45-64 approve, though even among Republicans 21% disapprove of the job he is doing.

*“Do you approve or disapprove of the job Donald Trump is doing as President?”**

<u>Response</u>	<u>All</u>	<u>Men</u>	<u>Wom</u>	<u>18-44</u>	<u>45-64</u>	<u>65+</u>	<u>Rep</u>	<u>Dem</u>	<u>Unaf</u>	<u>Sub-urbs</u>	<u>City Area</u>	<u>Smal Twn.</u>

*Voter subgroup margins of error, men 6.3%, women 6.1%, Republicans 8.0%, Democrats 7.6%, unaffiliated 7.3%, 18-44 6.7%, 45-64 7.3%, 65+ 9.7%, suburban area 6.3%, city area 9.0%, small town area 11.2%.

Jared Polis Job Approval

Governor Jared Polis currently has a +12% job approval rating, with 49% approving of the job he is doing, 37% disapproving and 14% unsure. This is driven by high marks among suburban voters (59% approve / 25% disapprove), women (51% / 29%) and voters aged 18-44 (51% / 29%). When considering groups that often lean more Republican, Governor Polis’s job approval is still evenly split among men and voters aged 45-64, while a small majority of voters over the age of 65 approve of the job he is doing. Right now, the numbers do not show any significant signs of weakness for the Governor.

*“Do you approve or disapprove of the job Jared Polis is doing as Governor?”**

2020 Presidential Election: President Trump vs Generic Democrat

President Trump trails a generic Democratic Party candidate by 12 points, 44% to 32% in a 2020 ballot test, with 15% of voters choosing some other candidate and only 8% undecided. Not surprisingly given President Trump’s job approval numbers, the largest Democratic leads are among suburban voters, women, younger voters aged 18-44 and unaffiliated voters.

Interestingly, women, younger voters and unaffiliated voters are also the most likely to choose some other candidate, which suggests that the ballot test could actually look worse for the president if those voters eventually choose between the two major party candidates. Needless to say there is not a lot of good news here for President Trump’s prospects in Colorado.

*“If the election for President were being held today, would you vote for Donald Trump, the Republican candidate, the Democratic Party’s candidate or some other candidate?”**

Overreach by Governor Polis and the State Legislature

In the wake of various recall efforts around the state, voters were asked whether they agree with the following statement: Governor Polis and the Democratic state legislature overreached during this past legislative session and passed bills that went too far and were out of touch with everyday Coloradans.

Voters were fairly split on this question, as a plurality of 45% agree, 40% disagree and 15% are unsure or don’t have an opinion. Intensity is highest among those who agree with the statement, with 28% strongly agreeing that the Governor and the legislature overreached. Republicans are also more unified on this question than Democrats, as 72% agree (including 54% who strongly agree) compared to only 58% of Democrats who disagree with the statement. Over one quarter of Democratic respondents believe that the Governor and the legislature overreached during this past session.

*“Do you agree or disagree with the following statement? Governor Polis and the Democratic state legislature overreached during this past legislative session and passed bills that went too far and were out of touch with everyday Coloradans.”**

<u>Response</u>	<u>All</u>	<u>Men</u>	<u>Wom</u>	<u>18-44</u>	<u>45-64</u>	<u>65+</u>	<u>Rep</u>	<u>Dem</u>	<u>Unaf</u>	<u>Sub-urbs</u>	<u>City Area</u>	<u>Smal Twn.</u>
Tot. Agree	45%	47%	43%	39%	55%	42%	72%	26%	39%	42%	43%	44%

*Voter subgroup margins of error, men 6.3%, women 6.1%, Republicans 8.0%, Democrats 7.6%, unaffiliated 7.3%, 18-44 6.7%, 45-64 7.3%, 65+ 9.7%, suburban area 6.3%, city area 9.0%, small town area 11.2%.

Efforts to Recall Governor Polis

After being asked about overreach, respondents were then informed of the effort underway to recall Governor Polis and asked whether they would vote yes to recall him or vote no to keep him in office. Despite a plurality agreeing that Governor Polis and the legislature did overreach during this past session, 47% of voters oppose the efforts to recall the Governor while only 38% support the recall and 15% are undecided. Intensity is strongest among those who oppose the recall, as 34% would definitely vote no. The recall efforts so far only enjoy majority support among Republicans, and support fails to hit 50% in any other major demographic group. Clearly supporters of the recall have a lot of work ahead to convince undecided voters that Governor Polis is out of touch and should therefore be recalled. Right now, nearly 30% of voters who do agree that the Governor and the legislature overreached remain unconvinced that a recall is the right course of action.

*“As you may know, there is an effort underway to recall Governor Jared Polis, and signatures are currently being collected around the state. If that effort to hold a recall election is successful, would you vote yes to recall Governor Polis and remove him from office, or would you vote no to keep Governor Polis in office?”**

*Voter subgroup margins of error, men 6.3%, women 6.1%, Republicans 8.0%, Democrats 7.6%, unaffiliated 7.3%, 18-44 6.7%, 45-64 7.3%, 65+ 9.7%, suburban area 6.3%, city area 9.0%, small town area 11.2%.

Conclusion

Colorado voters are divided on the direction the state is heading. They do not approve of the job Donald Trump is doing as President, while a near majority approves of the job Governor Polis is doing. However, a plurality also agrees that Governor Polis and the state legislature overreached during this past legislative session and passed bills that went too far and were out of touch with everyday Coloradans. That being said, voters do not believe that Governor Polis should be recalled.

The ability of Republican candidates to make any gains whatsoever in Colorado will be largely dependent on how these trends continue to take shape: Will enough voters be convinced of overreach to give Republicans a shot during next November's elections, especially following next year's legislative session? Just as important, how much will President Trump's negative job approval affect down-ballot Republicans? Those are the two big questions to watch heading into 2020.

Survey Methodology

This survey was conducted by live dialing landline and cell phone sample, as well as, conducting online interviews. The phone sample used for this survey was randomly drawn from a state of Colorado voter file. The online interviews were collected using Dynata online panel. The survey response data was weighted based upon past general election voting demographics. The interviews were conducted on July 15th – 17th, 2019. Three attempts were made to interview each household in the sample. This survey has a margin of error of +/- 4.38% at the 95 percent confidence interval.

Magellan Strategies

Colorado General Election Voter Opinion Survey

Topline Results

Magellan Strategies are pleased to present the topline results of a 500n live telephone and online survey of likely 2020 general election voters in the state of Colorado. The interviews were conducted July 15th – 17th, 2019. This survey has a margin of error of +/- 4.38% at the 95 percent confidence interval. This survey was weighted based upon past general election voting demographics.

T1. For statistical purposes only, could you please tell me if you are registered to vote in Colorado as a Republican, a Democrat, an unaffiliated voter, some other party or are you not registered to vote?

Unaffiliated	36%
Democrat	33%
Republican	30%
Other	1%

T2. Although it is a long way off, how likely are you to vote in the 2020 November election for President, Congress and the state legislature?

Extremely Likely	84%
Very Likely	12%
Somewhat Likely	4%

T3. Generally speaking, do you think things in Colorado are headed in the right direction or do you feel that things are off on the wrong track?

Right Direction	44%
Wrong Track	41%
Unsure or No Opinion	15%
Refused	0%

T4. Although it is a very long way off, how interested would you say you are in the 2020 elections for President, Congress and the state legislature? Using a scale from 1 to 10, with 10 meaning you are very interested in the 2020 elections, and 1 meaning that you are not interested at all, please choose a number that best describes your interest in the 2020 elections.

Woman	52%
Man	48%

Survey Methodology

This survey was conducted by live dialing landline and cell phone sample, as well as, conducting online interviews. The phone sample used for this survey was randomly drawn from a state of Colorado voter file. The online interviews were collected using Dynata online panel. The survey response data was weighted based upon past general election voting demographics. The interviews were conducted on July 15th – 17th, 2019. Three attempts were made to interview each household in the sample. This survey has a margin of error of +/- 4.38% at the 95 percent confidence interval.
