

In your own words, please describe the reasons why you are undecided or unsure about the coronavirus vaccine.

Region/Sex	Age	Marital	College	Party	Response
Urb. Male	Yng. Gen X	Married	4+ Yr	Dem.	Other antibiotics have over 10 years of testing
Urb. Male	Yng. Gen X	Married	4+ Yr	Dem.	1. Where there is risk, there must Be Choice. 2. What are the long term effects of chemicals 5+ years 3. Is there fetus stem cells in vaccine 4. Will vaccine address all strains Of the Rona 5. If exposed to the Rona, and one has had therapeutics or naturally healed from it, will a Vaccine matter 6. Things are so political nobody is sure what is the truth
Sub. Male	Old Mill.	Ref.	4+ Yr	Dem.	UK strain, South African strain etc. does the vaccine provide long term immunity or do the antibodies diminish over time If diminished, how long is vaccine effective
S Town Fem	Old Boom	Single	4+ Yr	Dem.	I have made an appointment to have the vaccine administered, but am unsure, as to whether it is safe for me to do so.
Rur. Fem	Old Gen X	Single	4+ Yr	Dem.	At this point in time I'm undecided because I'm just not a big jump on the bandwagon vaccine person. That being said, I understand the seriousness of the Corona virus. Even though I am technically in a risk category for middle aged women I have lived a perfectly healthy life. I rarely if ever get sick. So I have never found it necessary to get the flu shot. I feel the same way about the vaccine. I have managed to avoid getting the virus and I'm not sure that I ever will. That doesn't mean that I'm opposed to getting the vaccine, I'm just not certain I will need it.
Urb. Fem	Old Gen X	Married	Less 4 Yr	Dem.	Had several people who received it who got sick
Sub. Male	Gen Z	Single	Less 4 Yr	Dem.	Dont know whats gonna happen after I take it Ive heard from friends they knew people who had the shot and got super sick plus not trying to become a zombie
Urb. Male	Old Boom	Married	4+ Yr	Oth.	Im not sure its safe. I need a good solid reliable data.
S Town Male	Yng. Boom	Married	4+ Yr	Oth.	Again if you actually do your research you will find that it is not a true vaccine. And what good is it if you have to still wear masks and still have the potential of getting coronavirus. Doesnt make a whole lot of sense. Again do your research.
Rur. Male	Old Gen X	Single	Ref.	Ref.	I will not have the government pump poisons into our living bodies...
Rur. Male	Old Boom	Married	4+ Yr	Rep.	Ill only take it if I need to for international travel
S Town Fem	Old Boom	Married	4+ Yr	Rep.	I haven't been able to get enough scientific info to make a decision yet.
S Town Male	Old Gen X	Married	4+ Yr	Rep.	Concerned about potential side effects
Sub. Male	Old Gen X	Married	4+ Yr	Rep.	Safety, herd immunity may not be necessary to get it
Rur. Fem	Yng. Boom	Married	4+ Yr	Rep.	Trust issues.

In your own words, please describe the reasons why you are undecided or unsure about the coronavirus vaccine.

Region/Sex	Age	Marital	College	Party	Response
Sub. Fem	Yng. Boom	Married	4+ Yr	Rep.	Too many negative side effects for long term implications.
Sub. Fem	Yng. Gen X	Married	4+ Yr	Rep.	I want the vaccine to be out longer with more of the population receiving it and want to do some more independent research before I make my decision. I will likely get it at some point but since Im not high risk and largely stay in my own home, I dont feel it is necessary to rush the decision.
Sub. Male	Yng. Gen X	Ref.	4+ Yr	Rep.	Its not been tested correctly.
Urb. Male	Silent	Single	4+ Yr	Rep.	Current vaccines are not yet approved, nor have they been peer-reviewed and they do not prevent the virus, only, and supposedly, reduce symptoms. Only relative efficacy is being reported and not absolute efficacy -- which are very different numbers. It's hard to trust this "fuzzy" math.
S Town Fem	Old Boom	Married	Less 4 Yr	Rep.	I am not sure it is safe and I don't want to be pressured or forced to take it
Sub. Male	Old Boom	Married	Less 4 Yr	Rep.	Not sure it was tested enough, Im healthy, probably able to handle the symptoms without the vaccine
Rur. Male	Old Gen X	Married	Less 4 Yr	Rep.	Lack of trust
S Town Fem	Old Gen X	Married	Less 4 Yr	Rep.	I want to find out first the side effects of the vaccines to our body.
Sub. Male	Old Gen X	Married	Less 4 Yr	Rep.	Already had covid week before Thanksgiving I have CHF and No Tyroid and I did damn good getting thru it up my Vitamin D and Zinc and drank Orange juice ate soup when I needed to eat something this whole covid is overrated and mask or no mask your going to get and I wore my mask faithfully Government handling this whole pandemic has been a false there was no need to shut the damn country down or the state for that matter
Rur. Male	Silent	Married	Less 4 Yr	Rep.	Just not sure yet. Not sure I trust the government
Sub. Fem	Silent	Married	Less 4 Yr	Rep.	If I get the virus I get it. If it's meant for me to die I will.
Urb. Male	Silent	Married	Less 4 Yr	Rep.	My Doctors have not had it yet.
Rur. Fem	Yng. Boom	Married	Less 4 Yr	Rep.	It is all a load of shit. Every virus mutations and this was just a reason to get that Alzheimer's dick into office
Sub. Fem	Yng. Boom	Married	Less 4 Yr	Rep.	Do not trust Vaccine.
Sub. Male	Yng. Boom	Married	Less 4 Yr	Rep.	Dont know whats in it.. Not trusting the fact that the vaccine was created in less then a year..

In your own words, please describe the reasons why you are undecided or unsure about the coronavirus vaccine.

Region/Sex	Age	Marital	College	Party	Response
Urb. Fem	Old Gen X	Single	Less 4 Yr	Rep.	Because I have a very low immune system. I am afraid that if I take the shot that I will end up getting covid
Urb. Male	Old Mill.	Single	Less 4 Yr	Rep.	Not undecided and not unsure. I dont know what is in the vaccine. I do not care what the so called professionals say. My body my choice, right Any vaccine that has Bill Gates fingerprints on it, I will refuse. Why were his previous vaccines refused in India, Africa How was this vaccine created so fast when on average it takes 11 years Why does Bill Gates own patten #060606 Where has the flu vaccine gone this year
Urb. Fem	Silent	Single	Less 4 Yr	Rep.	I feel I may already be immune to covid
Urb. Male	Silent	Single	Less 4 Yr	Rep.	Rushed through, and I don't trust Fauschi. Not enough testing.
Urb. Fem	Yng. Boom	Single	Less 4 Yr	Rep.	Im scared of it. My faith says that God is in Control.
Rur. Fem	Yng. Boom	Married	Ref.	Rep.	There have been many many bad reactions to the vaccines. We have no idea what has been snuck into it. And until we know they are CLEAN of anything we shouldn't be putting in our bodies, our family won't get the vaccine.
Rur. Fem	Yng. Gen X	Married	Ref.	Rep.	Not been proven
Sub. Fem	Yng. Boom	Married	4+ Yr	Unaf.	Had reaction to a vaccine in the last 2 yrs
S Town Male	Yng. Gen X	Married	4+ Yr	Unaf.	I dont trust the media.
Sub. Male	Old Mill.	Single	4+ Yr	Unaf.	I am healthy probably better to give it people who need it
Sub. Male	Yng. Mill.	Single	4+ Yr	Unaf.	Long term effects are unknown for new vaccine technology
Rur. Male	Yng. Boom	Married	Less 4 Yr	Unaf.	The rate of success with annual flu vaccinations and efficiency of the current vaccinations relate- I think.
Sub. Fem	Yng. Boom	Married	Less 4 Yr	Unaf.	Not sure about side effects
Sub. Fem	Yng. Boom	Married	Less 4 Yr	Unaf.	Masks offer 99% protection and the vaccines offer less percentage protection. Seems stupid to put something into your body which has less protection than wearing a mask.
Sub. Male	Old Gen X	Ref.	Less 4 Yr	Unaf.	Our natural immune system is more effective than the human trials they are forcing on people. Also stop calling it a vaccine, even the manufactures won't call it that.
S Town Fem	Yng. Gen X	Ref.	Less 4 Yr	Unaf.	I want too see how everybody else is first. I don't want an arm growing out of my head.
Sub. Fem	Gen Z	Single	Less 4 Yr	Unaf.	N/A

In your own words, please describe the reasons why you are undecided or unsure about the coronavirus vaccine.

Region/Sex	Age	Marital	College	Party	Response
S Town Fem	Old Boom	Single	Less 4 Yr	Unaf.	Safety
Urb. Male	Old Gen X	Single	Less 4 Yr	Unaf.	Not taking a vaccine for something that has a 99% recovery rate .
Urb. Fem	Silent	Single	Less 4 Yr	Unaf.	Efficacy of vaccine, allergic reactions
Sub. Male	Yng. Gen X	Single	Less 4 Yr	Unaf.	I consider myself very low risk and a very low risk to others based on my age, health n daily routine
Urb. Male	Yng. Gen X	Single	Less 4 Yr	Unaf.	I know that available vaccines are both experimental and less than 100% effective. Which leaves reasonable doubt that a vaccine is right for me.
