

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
F	18-24	D	Adam.	No	I don't believe enough research has been done about the vaccine.
F	18-24	U	Adam.	Yes	Don't know the long term effects
F	18-24	U	Adam.	No	I already had COVID-19 and I am not required to by my job.
F	35-40	R	Adam.	Yes	Cause it doesn't work, and I believe there is a strong political and financial agenda behind it
F	41-50	D	Adam.	No	Regular vaccine and boosters have nearly killed me multiple times. I will not take ANY vaccine
F	41-50	D	Adam.	No	I did on prior page
M	41-50	D	Adam.	No	Not sure how to make an appointment. I don't have health insurance.
M	41-50	O	Adam.	Yes	The vaccine does not prevent you from catching Covid 19 not does it prevent you from spreading it. Why get something that doesn't work?
F	51-54	U	Adam.	No	My doctor said no
F	55-64	R	Adam.	Yes	I live in america. The land of the free and the home of the brave.
F	55-64	U	Adam.	Yes	I have had all the vaccines I need.
M	55-64	U	Adam.	Yes	Waiting for hers immunity
F	18-24	U	Arap.	Yes	Waiting to see how it is received and how others do after taking it.
F	25-30	R	Arap.	Yes	Worried about side effects long term
F	35-40	U	Arap.	No	I'm not 100% sure about the vaccine
F	41-50	D	Arap.	No	I don't believe enough testing has been done. It has been proven that some people have taken the virus and still contracted covid.

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
					Everything we’ve been told about illness for the last 100 years has suddenly been reversed. Herd immunity exists. Natural immunity is better than a vaccine. Healthy people are not at risk. The virus now seems to be human-engineered. Big pharma gets huge profits off this and zero liability. The “virus” has been politicized and there’s now no truth or veracity to be had. Economically speaking something given away for free has exactly that much value. The vaccine was approved way too quickly. Either it takes 10-20 years to safely test a vaccine or rushing through trials has no consequences. Pick one. I could go on but ultimately I had the virus. I’m not in a high risk group. Based on everything I’ve learned natural immunity is better (go research the 2009 H1N1 flu and the immunity response of people who lived through the Spanish flu). Net net. I guess it’s the gulag for me.
F	41-50	NR	Arap.	Yes	
F	41-50	R	Arap.	Yes	I don't want it.
F	51-54	R	Arap.	No	Past history of serious allergic reactions to vaccines. Auto immune disorders. Too much unknown about long term effects.
F	25-30	U	Arch.	No	It’s bullshit.
F	18-24	U	Bold.	No	Time management issues
F	55-64	U	Bold.	Yes	Until further scientific proof emerges that natural immunity is not good enough, I will not get the unproven, untested vaccine.
F	31-34	U	Broo.	Yes	The virus has 99.8% survival rate
M	65-74	U	Broo.	Yes	Have medical contraindications
F	65-74	R	Cust.	No	I don’t think it’s necessary because there are other ways to mitigate or treat the virus and I don’t trust the vaccine.
M	65-74	U	Delt.	No	Complete hoax, fake vaccine for fake virus
M	25-30	U	Denv.	No	Do not want to.
F	31-34	D	Denv.	No	I am holistic and rely on natural resources.
F	35-40	R	Denv.	Yes	I think the vaccine is bullshit
M	35-40	U	Denv.	Yes	Had Covid and the FDA has not fully approved these emergency experimental vaccines
M	51-54	U	Denv.	Yes	No need
F	55-64	D	Denv.	No	I have other health issues that may be at risk with the vaccine.

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
F	31-34	U	Doug.	No	It is experimental. There is a study that states a median of 4.2 years after drugs are approved for safety concerns to come to light (Yale). This vaccine isn't even approved. It has already killed nearly 5,000 people according to vaers. This is more than all vaccines combined in the last 20 years. There is also another study that states that less than 1% of vaccine adverse reactions are actually reported (Hardvard). I trust my immune system.
F	41-50	R	Doug.	No	answered above
F	41-50	R	Doug.	No	If they come out with a fully tested nonRNA vaccine I will consider it.
F	41-50	U	Doug.	No	Covid is not going to kill me. I never get Flu Vaccnes or anything else. Not sure why this one should be any different
M	55-64	R	Doug.	Yes	Too many health issues related to the vaccines; not FDA approved.
F	18-24	R	El Pas.	No	I think a vaccine that has had less than a year to research symptoms afterwards is extremely dangerous. There are now so many cases of individuals showing deadly symptoms after the vaccine.
F	18-24	R	El Pas.	Yes	It's long term effects are unknown and I don't trust it.
M	31-34	U	El Pas.	No	My lifestyle does not make me more likely to be exposed. I'm choosing to continue to social distance and wear a mask instead.

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
F	35-40	D	El Pas.	Yes	I believe it was way over hyped and most of what went on was political and possibly biological war fare. I know several people that had Covid and only one serious case. I also have several doctor and nurse friends who said what they experienced in the hospital was nothing like what was being reported, they rarely were ever full and sometimes hadn't had Covid patients for months. My son was hospitalized due to pneumonia a few months ago - nothing Covid related. He briefly got sick while my husband and I were sick with Covid, a few days of fever and a little coughing. It wasn't even as bad as my husband and I and he had just had pneumonia. Our other six kids didn't get sick. I believe in vaccines, but will not do HPV, flu or Covid for myself or kids. Illness happens, we can't live in bubbles, that's not life. I also think most Covid patients were not treated correctly or well, resulting in more deaths. I believe they also inflated death numbers by stating Covid as a cause of death when it wasn't (confirmed by a doctor friend who was pressured to do this). I took my kids out of school due to them having to wear masks and believe the one benefit is so many parents now see how badly schools try to politically influence and indoctrinate their kids and hopefully more people like myself will keep their kids out of school and more people will homeschool.
F	35-40	U	El Pas.	No	Already explained it but I also believe that my family takes enough precautions and vitamins . That we do not need to wear a mask to protect us. Also that if I were around my loved one that has a high risk then we would do what's necessary. Who ever is at high risk should do the same!
F	41-50	D	El Pas.	No	Don't want to
M	41-50	O	El Pas.	Yes	The vaccines aren't approved. The 95% effective rating is based on observations of ~100 people per vaccine trial. Healthy people are not in need per science.
M	55-64	R	El Pas.	No	Give them an in and and already shown how they will take a mile, polis used this epidemic to destroy business, and showed how he is part of the NWo
M	65-74	D	El Pas.	No	Don't trust or Government an Politician anymore, probably man made.
M	51-54	R	Frem.	No	Zero long term studies. Never before has something been rushed into use like this has. mRNA vaccines have never been used prior to this. Long term health is a much bigger concern than a "cure" that has zero long term studies.

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
M	25-30	R	Garf.	Yes	Waste of time. Sorta like getting a flu shot but for political stance
F	65-74	R	Garf.	Yes	Already had it. Vaccine is still listed as experimental. No way anyone can know long term effects.
M	31-34	U	Gilp.	No	In am not a member of a high risk group
F	18-24	D	Jeff.	Yes	Not been 3 months since I had covid so I still have antibodies
M	18-24	U	Jeff.	Yes	I don't believe healthy people need it, high-risk individuals should get it, but someone who isn't high risk doesn't really need to get it
F	31-34	U	Jeff.	No	Allergy to some forms of polysorbate, have to wait for another vaccine I'm told.
M	35-40	R	Jeff.	No	I'm terrified of needles
F	35-40	U	Jeff.	Yes	I still have antibodies in my body from having the virus. I am also not going to put an experimental mixture of things in my body that has not been tested long enough. I would be extremely angry if this vaccine somehow gets mandated
M	41-50	D	Jeff.	No	If I got this disease, I probably wouldn't even know it. If you are concerned, get the vaccine. You don't need me to protect you.
M	41-50	O	Jeff.	No	I've never had a flu shoot why would I get one of those
M	41-50	R	Jeff.	No	Clinical trials showing serious injuries and or death as a result of this politically driven vaccine. Along with numerous doctors advising against it.
M	41-50	U	Jeff.	No	I see it a the flu- I'm young enough to overcome it
M	55-64	D	Jeff.	No	I've been hospitalized
F	55-64	U	Jeff.	No	EXPERIMENTAL vaccine, new, unproven technology & invasive. my immune system can handle this & other viruses
F	65-74	D	Jeff.	No	I'm very cautious, no urgent need, concern re effect on DNA, no open appt for J&J vaccine the two times I tried to get appts.
F	65-74	R	Jeff.	No	I have been vaccinated
M	31-34	R	La Pl.	No	I don't want to be part of the worldwide test trial
M	55-64	D	La Pl.	No	I have been in so many exposure risk situations and have not gotten it.
M	25-30	O	Larm.	No	Mistrust
F	51-54	R	Larm.	No	Not at risk. Vaccines have not been properly vetted. Believe Covid numbers have been hugely exaggerated for financial gain and fear mongering.
F	55-64	R	Larm.	No	The vaccine is dangerous itself. I do not trust that mRNA is safe.

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
F	55-64	U	Larm.	No	I have never gotten any vaccines in the past 5 decades and don't see a reason to change that now.
F	35-40	U	Mesa	Yes	No need when it's a mild flu. My body's immune system needs to do its job
M	55-64	R	Mesa	No	Messing with MRNA is new for them, and there is no way of knowing what the long terms effects may be. We are not sure and I am not comfortable with that. It is my body, and well within my rights to refuse treatment.
M	65-74	U	Mesa	No	Dangerous and totally unnecessary
M	35-40	U	Pueb.	No	I have zero concern about the virus.
F	55-64	D	Pueb.	No	It's too new. I'm not a government guinea pig and I don't want to be a participate in this wide scale research. No one knows long term implications of the vaccine side effects.
F	51-54	U	Rio Grn.	No	it is not a proven safe and effective vaccine. I am not interested in being part of a scientific study.
M	35-40	U	Rout	Yes	THE VACCINE IS SUPPOSED TO GIVE YOU ANTIBODIES, YET INFECTED PEOPLE ARE BETTER IMMUNIZED THAN VACCINATED PEOPLE. THERE ARE *ZERO* REASONS FOR RECOVERED INDIVIDUALS TO TAKE THE VACCINE! CRIMINAL!
F	18-24	R	San Mg.	Yes	I do not trust the vaccine because it hasn't been researched enough and the side effects are scary.
F	55-64	R	Tell.	No	Not adequately tested.
F	25-30	NR	Weld	No	I refuse to inject my body with a massive amount of chemicals produced by a genetic modification company. There has never been actual proof besides what mainstream media portrays that viruses can actually be spread. Koch's postulates has never been proven and the supposed covid 19 virus has never been able to be isolated which is a requirement when identifying viruses. I also simply do not feel the need to live my life in complete and utter fear, this whole thing has been absolutely ridiculous.
F	25-30	R	Weld	No	Nearly 98% of people who got Covid 19 survived... so why would I get a vaccine that was rushed out to the public and have serious health risks such as blood clotting and even death? The answer is I would never get this vaccine.
M	25-30	R	Weld	No	My work schedule changes constantly and 2 doses is a pain
M	35-40	D	Weld	No	Because I'm not a test subject. You have no long term side effect data

“Being as descriptive as possible, please describe the reasons why you have not received a COVID-19 vaccine.”

Gender	Age	Party	County	Had COVID	Response
F	41-50	R	Weld	No	Afraid of side effects
M	41-50	U	Weld	No	I don't trust Big pharmaceutical companies. I have already been hurt by their medication in the past and I won't do it again.
